1. You have a new duel.
2. Click the share icon to invite friends.
3. After sending out invitations, if you want to Participate, click on join.

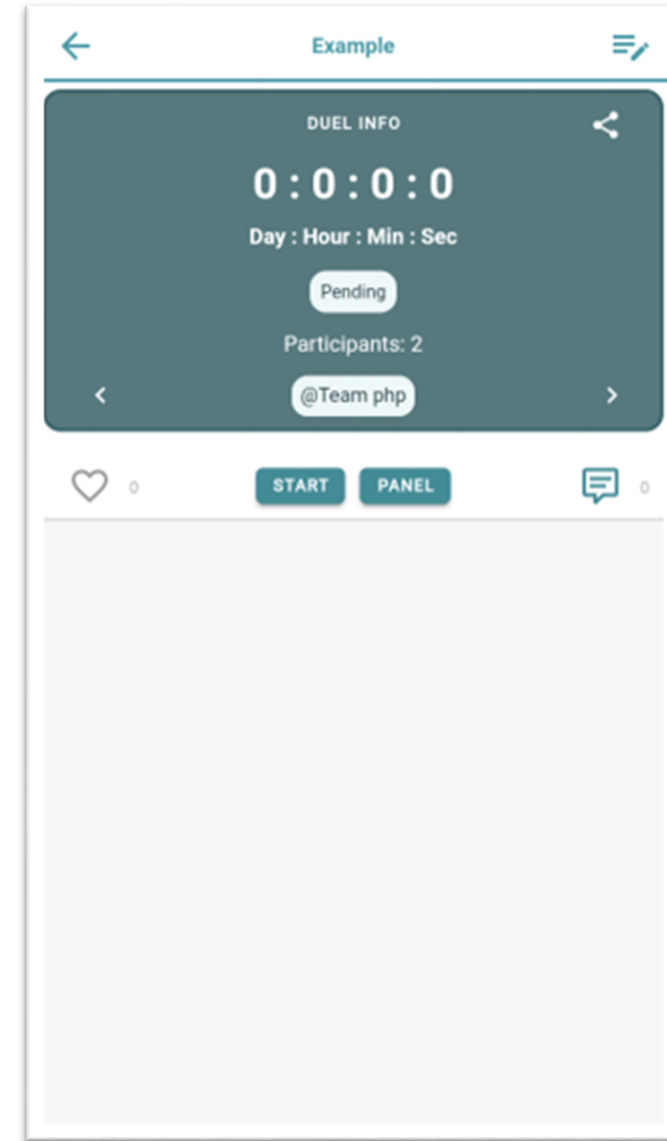

Share with friends to invite participants.

When you join a duel, you will have a project panel automatically created. Click on it.

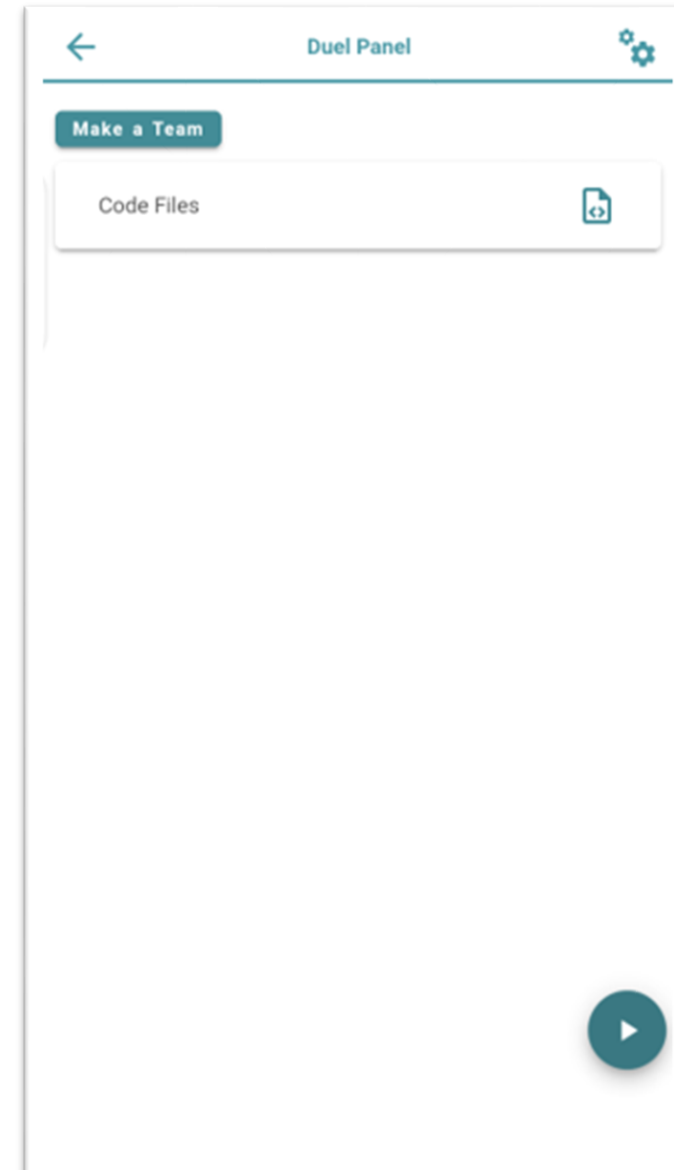

Select the language you'll be dueling in.

The screenshot shows a mobile application interface titled "Panel Settings". At the top left is a back arrow icon. Below the title bar, there is a section labeled "Application type" with a dropdown menu currently displaying "PHP". A blue "CONTINUE" button is positioned at the bottom right of the screen.

1. A default code file is created. Edit, and write yours.
2. You can make a team if you want a group to contribute to your code. Take note, the number of people in your team will be visible to the judges.

Copy the link and invite your team mates.
